

Quality and Environment Policy

Tejas Vereá S.A.U. dedicates its main activity to the manufacture of ceramic roof tiles and completes its activity with the commercialization of the special pieces and the necessary roof accessories for the complete installation of the cover.

Likewise, it has developed its own installation system that increase the performance of the roof and the durability of its components.

The Management of Vereá has opted for Quality and protection of the Environment as fundamental pillars of its business strategy, improving its overall performance and minimizing the environmental impact of its activity.

This commitment is materialized in the following principles:

Verifying the fulfillment of the requirements of the clients, as well as the legal and regulatory and the other requirements subscribed with the interested parties.

Ensuring that any person performing tasks on behalf of the company has the appropriate education, training, skill and experience.

Reviewing the processes and services of the organization observing the better techniques available that guarantee a higher efficiency and a bigger grade of protection.

Establishing monitoring and measurement methods to ensure that planned results are achieved.

Achieving objectives for the continuous improvement of the quality management system and environmental performance of the organization, in line with business profitability.

The Managing Director undertakes to provide the appropriate means for each organizational level of Tejas Vereá S.A.U. So that the Quality and Environment Policy is understood, implemented and respected by all members of the company and other subcontractors working for Tejas Vereá S.A.U.

Vereá acquires the commitment to the United Nations Global Compact, promoting the Sustainable Development Goals.
