

## ARTÍCULO

Flat stainless-steel fixing clip

## SCHEME

## CHARACTERISTICS

### Material

Available in stainless steel AISI 304 and AISI 316

### Declared characteristics Stainless-steel Fixing Clip Flat

|                |        |
|----------------|--------|
| Long (L):      | 75 mm  |
| High (H):      | 12 mm  |
| Weight (A):    | 32 mm  |
| Wire diameter: | 1,3 mm |

## OBSERVATIONS

Flat stainless-steel fixing clip AISI 304 or AISI 316 painted in brown color. This type of clip improves the fit of the roof tiles and minimizes the visual impact of the clips on the roof by going practically unnoticed.

The correct direction of placement must be that the pressure zone (the longest) is hidden and anchored in the tile of the previous line, leaving the shortest area visible.
