

## ARTÍCULO

**Ventilation batten**

## SCHEME

## CHARACTERISTICS

### Material

Zinc Coated Galvanized Steel (Z100)

### Declared characteristics

Length:	78,74"	2000 mm
Width:	1,18"	30 mm
Height:	0,98"	25 mm
Thickness:	0,023"	0,6 mm

## DESCRIPTION

Galvanized steel profile subjected to a cold rolling process for its forming, with anti-corrosion type Z100 zinc coating.

## APLICACION

Multi-perforated omega-type metal profile for the execution of a system of battens on the roof, which maximizes ventilation under the tile thanks to its perforations (maximum diameter 5 mm).
