

ARTÍCULO

Adhesive tape for sheets

SCHEME

CHARACTERISTICS

	Benefits
Length	25 m
Width	60 mm
Operating temperature	- 40°C +80°C
Adhesive strenght	> 30 N/25 mm
Tear resistance	> 50 N/25 mm
Elongation at break (%)	150% to 250%

DESCRIPTION

Mesh reinforced flexible PE tape with a moisture resistant acrylic adhesive side. Its use is specifically indicated for the hermetic sealing of joints of breathable sheets and vapor barriers.

OBSERVATIONS

To ensure good adhesion, the surface of the sheet must be free of dust. The optimal range of temperatures for laying is between 15°C and 30°C.
